

NeXR welcomes you to the VR Seminar experience - Now's the time to learn networking in the Virtual Reality

NeXR Technologies pools globally unique resources for the creation of extended reality applications.

With NeXR Seminar, the Berlin-based company is implementing a B2B use case that will change the future of seminars, conferences and employee training.

The VR seminar has come to stay. NeXR now delivers the live experience via VR stream. The process is simple: You get a pair of VR glasses delivered to your office or home office, put them on, and dive into a world of immersive learning.

Scientific advisor of the project is Alexander Sascha Wolf, director of the Dictyonomie Institute for value-based networking in Berlin. Wolf teaches techniques to effectively connect people in groups. To do so, he usually travels around the world as a speaker.

Together with Wolf, NeXR has developed a VR learning solution in which the networking seminars are conducted as a virtual experience. To do so, NeXR created a body scan from seminar host Wolf, rendered it for animation in motion capturing, and developed VR worlds as a virtual seminar environment.

The course of the VR seminar with Alexander Sascha Wolf:

In the VR workshop, one now meets Wolf at the digital Brandenburg Gate in Berlin. In a first vote, he asks the participants to decide on discussion options: Should the group start with a small talk about the weather, or talk about their current challenges, both professionally and personally? Participants decide on either surface or deeper conversation options. If they want to remain on the surface, the participants drift virtually apart. If they decide on deeper conversations, the group moves closer together. "We learn in this VR seminar that small talk doesn't get us anywhere, and I help the

About NeXR Technologies

NeXR stands for the development of next generation technologies and apps that combine Augmented Reality (AR), Mixed Reality (MR) and Virtual Reality (VR) to form the next Extended Reality. NeXR Technologies SE from Berlin (XETRA: 995C) is a Virtual Reality (VR) First-Mover with unique hardware and software expertise. The business segments VR Experience, 3D Scanner Systems and Motion Capture & Animation deal with trend-setting services and products and appear under their own names and labels. VR projects and services are offered under the label "VRiday", "3D Instagram" develops and distributes the self-developed scanner systems and "OnPoint Studios" offers all services around motion capture and animation in one of the largest MoCap studios in Germany. These three business areas work closely together under the umbrella of NeXR Technologies SE. While "VRiday" as an agency offers consulting, planning, implementation and publishing of VR Experiences for companies and brands, the technology of the business field "3D Instagram" is used for the creation of 3D avatars, which can be animated and integrated into virtual worlds with the help of the Motion Capture Studio OnPoint. 3D Instagram develops and distributes its own 3D scanners and application software. With the help of the scanners photorealistic 3D avatars can be generated in seconds. NeXR Technologies SE is listed in the General Standard of the Frankfurt Stock Exchange.

CORPORATE NEWS

participants to go deeper than exchanging business cards," says Wolf. The VR seminar is filled with interactions to learn the magic of networking based on mutual support.

"In times of digitalization, it is more difficult to network because you no longer meet people by chance at events or in the kitchen at the office. Nevertheless, it is possible to systematically build networks," says Wolf. He cites the example of the Hanseatic League, a great trading network from the Middle Ages. For the big Hanseatic Day, the participants gather at the port of Hamburg, Germany. Wolf explains "The Hanseatic network only met and exchanged ideas once a year. The network was successful because they were committed to the same values - according to the principle of the Honourable Businessman". Through an interactive game, the participants learn about the importance of values in networks by loading virtual ships. "It is important to speak quickly about values. A variety of different backgrounds work well together when they share the same basic values," Wolf explains and calls out for the strengthening of one's own networks. "You have to make sure that the network meets regularly, even if it is only once a year. In a globalized world, this naturally works well in a VR environment.

2

Markus Peuler, CEO at NeXR Technologies: "With Alexander Sascha Wolf, we have a specialist for networking who demonstrates that a space-time problem does not exist in virtual reality, and is therefore an obvious option in future networking."

On request, journalists can experience the VR seminar at the NeXR Head Office in Berlin.

NeXR Technologies SE (ISIN DE000A1K03W5) - General Standard/Regulated Market

About NeXR Technologies

NeXR stands for the development of next-generation technologies and apps that bring Augmented Reality (AR), Mixed Reality (MR) and Virtual Reality (VR) together to create the next Extended Reality (XR). NeXR Technologies SE from Berlin (XETRA: 995C) is a virtual reality (VR) first mover with unique hardware and software expertise. The business units 3D Scanner Systems, Motion Capture & Animation and VR-Experiences deal with future-oriented services and products and are connected within a unique value chain. "3D Instagraph" develops and distributes the in-house developed scanner systems; photorealistic 3D avatars can be created in seconds. "OnPoint Studios" offers all services around motion capture and animation in one of the largest MoCap studios in Germany and can animate the avatars directly and individually from the 3D scanner. The logical addition to the value chain is the brand and VR agency "VRriday", which integrates the avatars into VR Experiences and, as an agency, offers consulting, implementation and publishing of VR Experience for companies. NeXR Technologies SE is listed in the General Standard of the Frankfurt Stock Exchange.
